Balchem[®] Plant Nutrition Research Paper

SUMMARY

Albion Experimental Formulation trial results from South Africa 2015 season These results are from split field applications Applied at 1 liter/ha rate

Soybean			Corn	
				Yield
#1	Yield (bushels/acre)		#1	(bushels/acre)
Standard		16.35	Standard	55.8
Experimental		29.74	Experimental	61.6
Difference		13.39	Difference	5.7
				Yield
#2	Yield (bushels/acre)		#2	(bushels/acre)
Standard		30.45	Standard	71.5
Experimental		36.8	Experimental	79.5
Difference		6.35	Difference	7.9
#3	Yield (bushels/acre)			
Standard		22.3		
Experimental		37.18	The results below a	re from fields that had
Difference		14.88	with the yield expre	essed as average from a

hat had 3 reps e from all 3 reps

Corr	า	
	Yield	
#1	(bushels/acre)	
Standard	54.33	
Experimental	66.73	
Difference	12.4	
	Yield	
#2	(bushels/acre)	
Standard	66.44	
Experimental	71.86	
Difference	5.42
